

A Worldwide Leader for Glass Plant Projects

TOLEDO ENGINEERING CO.

TOLEDO ENGINEERING CO.

Toledo Engineering Co., Inc. (TECO) has been serving the worldwide primary glass manufacturing industry since 1927.

Toledo Engineering is one of the world's largest glass industry engineering, project management and construction companies.

We provide premier technical, project management and construction services for all glass manufacturing processes and all glass plants.

The TECO group of companies are innovators in the glass furnace industry and have offices in both the U.S. and the U.K.

Innovation creates:

Improved efficiency

Technology enables higher melting rates and more efficient energy consumption

Improved glass quality

Best use of refractories and design enhancements minimize glass defects

Extended campaign life

Innovative design features allow maximum resistance to wear

Improved output

Improved glass melting capacity and designed furnace flows increase output

Reduced emissions

Generation of NO_x and CO₂ is minimized

Unbiased solutions tailored to your production parameters

the clear choice for glass furnace projects and installations

We understand the importance of your investment and waste no time in taking your project to completion. We run tight schedules and are fully committed to the deadline we establish.

Our experts have been providing technical support to the worldwide glass industry for many years, working together with clients to fully understand requirements and to devise the very best solutions for them. No problem is too big and you can rely on us.

- Project managers on-site
- Staff engineers on call
- Cost, quality and schedule control systems in place
- Superb safety record
- Global construction experience

Toledo Engineering technology: the difference is clear

Innovative technology and
enhancements to:

- Glass furnaces
- Float plants
- Distributors and forehearths
- Electric boost
- Batch plants
- Bubbler systems
- Control systems
- Equipment and parts

Services

- Turnkey plants
- Furnace modernization
- Furnace modelling
- Audit and technical support
- Hot repairs
